

QUALITY MISSION STATEMENT

As a trusted partner of our customers, we deliver quality.

AccuBio is committed to providing health diagnosis and support for life products in the field of global in-vitro diagnostics.

We foster a quality culture based on:

- Highly qualified / proactive people, who are encouraged and empowered to challenge the impossible, take ownership, embrace the challenge and turn the impossible into the possible.
- An environment of customer centricity and continuous improvement
 - We are Customer Oriented, believing that customers and patients are the starting point of all our work and that we succeed if our partners succeed.
 - We encourage continuous innovation to improve overall performance throughout the business. Innovation is expected everywhere (e.g. technology, management, business process). No improvement is too small or too large.
- Growing Together
 - The company, shareholders and employees form a sustainable community of interests, undertakings and destiny
 - Every employee who continues to contribute can achieve sustainable and healthy growth
 - We insist on balance between re-investment, return to shareholders and employees
- Guaranteeing compliance with all relevant standards, regulatory and legal requirements.
- Adherence to robust and standardised processes, applying Integrated risk management and global tools. Our measurements aligned with customers' expectations and regulatory needs.
